Finally, we will derive recommendations for action to be taken.

Research project INFOR 165 is being funded by the Research and Technology Board of Trustees of the pulp and paper industry in the German Pulp and Paper Association (VDP).

The results of the project are of major importance for the entire paper industry. There is a high degree of usability both for graphic, packaging, hygienic and specialty paper. The use and the available of bio-based products are indispensable for a further strengthening of paper in its competitive battle with other materials. They also constitute an important basis for the vision of a sustainable bio-based economy by the year 2030.

**Period of time:** 01.01.2013 bis 31.12.2013

**Remarks**

Research project INFOR 165 is being funded by the Research and Technology Board of Trustees of the pulp and paper industry in the German Pulp and Paper Association (VDP).
