

## Information:

[www.ptspaper.de/en/fpt](http://www.ptspaper.de/en/fpt)

### Studies & workshops from previous years:

Study: Opportunities for site-based resource networking – Integrated production sites

Workshop 1: Sustainable paper production – Assessment and significance for the paper industry

Workshop 2: Mineral oil in food – current status and possible solutions

Study: Challenges and opportunities of the CEPI Roadmap 2050 for the paper supply industry in Germany

Workshop 1: Innovative packaging solutions – New opportunities for the paper industry

Workshop 2: Challenges and opportunities of the CEPI Roadmap 2050 for the paper supply industry in Germany

Study: Future study "Paper & Fibre World 2030" together with the Association of German Paper Mills (DPI) and the German Association for Paper and Plastics Processing (HPV)

Workshop 1: Paper value chain – New markets through fiber-based products?

Workshop 2: PERSPEKTIVEN 2030 – Future market paper

Study: "Challenges and opportunities for the paper supply industry in the field of packaging papers" with a focus on food packaging and securing waste paper cycles

Study: "Industry 4.0" – Opportunities for a renewal of the industry in the digital age

Study: "Bio-based additives and auxiliaries for the paper industry"

Study: "Sustainability assessment in the packaging value-chain"

## Forschungsvereinigung Papiertechnik e.V. (FPT)

Pirnaer Straße 37  
01809 Heidenau

## Contact

**FORSCHUNGSVEREINIGUNG  
PAPIERTECHNIK E.V.**

## Forschungsvereinigung Papiertechnik e.V.

Network platform for  
the fibre industry and the  
"Paper" value chain

The Forschungsvereinigung Papiertechnik e.V.  
(Research Association for Paper Technology)  
is a donor association of the  
Papiertechnische Stiftung (PTS).

**Matthias Höhsl**  
FPT Executive Board,  
Voith – Senior Manager  
Disruptive Innovation

**Prof. Dr. Frank Miletzky,**  
Managing Director FPT &  
Senior Advisor PTS

## Innovative solutions need co-operation

The progressive transformation towards a bio-based society offers advantages, challenges and an enormous opportunity for all companies looking for new and sustainable products. Alternative compositions of raw materials, renewable building materials, reduced water and heat needs are the biggest challenges. They cannot be answered by one industry sector alone. For this purpose close co-operation with different sectors, such as the process and mechanical engineering, chemistry, manufacturing industry as well as with research institutions are mandatory.

The Paper Technology Research Association (Forschungsvereinigung Papiertechnik e.V., FPT) plays an important role in this research by bringing together the extensive experience of the network. With the Paper Technology Foundation (PTS), the network can draw on permanent ideas and approaches that are real and relevant for its members. Become part of this fascinating network!

A network lives from coming together!

### Matthias Höhsl

FPT Executive Board

## Become a member!

Our membership application form and further information can be found under: [www.ptspaper.de/en/fpt/](http://www.ptspaper.de/en/fpt/)

+49 (0) 3529 551-705 • [frank.miletzky@ptspaper.de](mailto:frank.miletzky@ptspaper.de)

## Added values for members!

- » Active Network platform for all companies in the dynamic “Paper” value chain
- » Free and exclusive participation in research forums & project-related committees
- » Participation in the annual PTS network day
- » Exclusive access to research results, information and studies
- » Participation in research studies
- » Representation of industries arguments in standardization topics
- » 10% discount on the wide range of further training courses on offer:
  - PTS Coating Symposium
  - PTS Corrugated Board Symposium
  - All events at [www.ptspaper.de/veranstaltungen](http://www.ptspaper.de/veranstaltungen)
- » 10% discount on a variety of services and products of the PTS
